WORK EXPERIENCE

- **UIUX DESIGNER**
SmartVie LTD | 2025 - Present
 - Design clear, accessible interfaces that translate complex IoT data and farm analytics into simple, actionable insights for farmers
 - Create wireframes, user flows, and high-fidelity mockups for Mori's core features, including device monitoring dashboards, recommendation modules, and decision-support screens
 - Collaborate with the product lead and development team to ensure designs are feasible, consistent, and aligned with product goals
 - Iterate on designs based on feedback, keeping the end user, the farmer at the center of every decision
 - Contribute to shaping a product experience that bridges the gap between agricultural knowledge and modern technology
- PRODUCT DESIGNER**
HMG Homes | 2022 - 2026
 - I worked as a Product Designer responsible for UX/UI design, Graphics design and editorial tasks
 - I create user-friendly interface, marketing visuals ensuring cohesive content across digital platforms
 - I designed user-friendly interfaces for a crypto trading app, focusing on intuitive flows for buying, selling and swapping digital assets while maintaining a clean, modern visual identity
- UIUX DESIGNER**
Loopay | 2024 - 2025
 - I led UIUX design for a fintech platform, creating seamless payment and wallet experiences ensuring brand consistency
